Kulkarni, Nikhil Dilip NK50864  
Dual Degree Civil Engineering, IIT Delhi  
English, Hindi

### **Citi Work Experience:**

As a part of Citi Data team, I have worked on the front-end development for BIPaaS (Business Intelligence Process as a Service) and MDBaaS (Maria DB as a Service). AngularJS is being used for the UI development with java as a backend for connecting with the databases.

I have also worked on DMA tools and helped develop a workflow in support of Oracle patching effort in and outside of OraaS using shell scripting.

As a part of process improvement project, me along with other grads are helping in developing a local inventory management solution for the admin team here at CSC Pune, so that it could be used to keep a track of hardware present at the centre. I am working on creating a dashboard to present the information in a simpler format using AngularJS.

### **Demonstrated Strength:**

- Java: Good understanding of OO principles. Have worked on project using java.
- Java EJB: Have worked on a project during training, creating a trading application, used session beans and entity beans.
- Python: Basic understanding of python, attended the introduction to python training.
- Shell Script: Have worked on automating tasks using shell scripting.
- AngularJS, HTML5: Worked on UI development using AngularJS & HTML5.
- MySQL, MongoDB: Basic understanding, worked on them during training project.
